

## India Composites Show 2012: Linking the Global Composites Industry!

With the success of industry specific trade shows and B2B conferences on Warehousing, Logistics, Supply Chain, Materials Handling, Cold Storage and the global Expo Summit series with the addition of South Africa and Turkey destinations, Manch Communications is emerging as a name to be reckoned with in the service industry.

To keep pace with the ever changing and growing economy, Manch provides the portal for businesses to grow in terms of ROI and is always on the lookout to promote new markets. With this objective, we are pleased to announce the undertaking of our composites debut show and 2 days conference, India Composites Show 2012 at India Expo Centre, Greater Noida, scheduled to be held from 1-3 November 2012.

The Indian composites industry has seen rapid growth in the last 5-6 years and it is estimated that the industry will grow at a compound annual growth rate of 22% in the next four years. In comparison to common materials, composites are superior and therefore its usage demand is increasing in sectors like Wind energy, the fastest growing renewable energy sector in India with a total wind power capacity of 11752, Mass Transport, Infrastructure, Automotive, Building and Construction, Chemical, Electrical, Aerospace, Defense and Marine. Accordingly, industries and companies are ever expanding to meet this growing need.

The current production of composites in India is about 3 lakh tons putting the estimate at 7.5 lakh tons, about 3% of the global volume, per annum by 2015. Increase in population, infrastructure needs and environmental issues will also boost the Composites growth. The rapid development of composites market in Asia, particularly in China and India, is expected to drive the growth of large players across the value chain of composites. Besides, with the emergence of a growing middle class and the steady GDP growth in the face of global recession, India is surfacing as a popular destination for FDI's, which augur well for the future of the Indian economy.

The India Composites Show and conference is an end-user oriented show designed to link and bring end users and professionals from across all the Composites industry segments, educating end-users and professionals through exposure to an array of complete range of processes, materials and composites solutions on an international scale. The show will host a number of key players, who will showcase their know-how and latest in technologies and solutions, presenting a niche for decision makers, buyers and designers from the most important application industries to expand their network. The conference will deal with key topics related to awareness and challenges hindering the growth of the Composites Industry.
